

SALAH AHMAD MAHMOUD AHMAD

Objective

Organized and motivated employee eager to apply time management and organizational skills in various environments. Seeking opportunities to expand skills while facilitating company growth.

Details

Date of Birth : 17 Feb 1987
Marital Status : Married
Nationality : Jordanian Turkish
Languages : Arabic English
Contact : 00962 -785895095
Email : Salah_geo87@hotmail.com

Education

Education Geology & Environmental /GAP= GOOD 2009 Hashemite University – Jordan
Linkedin www.linkedin.com/in/salah-ahmad-8b3a5b14

Key Competencies

GEOLOGY SOFTWARE:
Surfer, Remote Sensing (RS), Grapher, RockWorke, 3D model, Aquifer Test, Logplot, MODFLOW, Aqtest .

- Global positioning system GPS, Global Information System GIS

WellCAD, Geovista, Century-Geo, WINlog (for Wireline logging and interpretation raw data).

Having Jordan, KSA, UAE - driving license.

SELF-CONFIDENCE, team worker, ability to learn, management, Leadership, Problem Solving, Communication .

Skills

Report Preparation, Data Interpretation, Time Management, Customer Relations, Cultural Awareness.

Certification & Training Courses

INJEAS Certifications (How to be a Leader, Successful Skills, Ethos Market,...).

Queen Rania competition to Design Environmentally Friendly Home with the support of German Agency number 4th for all Jordan .

Mud Logging Services & Petroleum geology from Jordanian Geologist Association (JGA).

First Aid course from Jordanian Civil Defence .

Geovista course logging and data interpretation by Terratec Geophysical service CO .

Fire alarm Inspection ,test and maintenance to Honeywell devoces from MDG .

Petroleum Industry course from Ministry of Energy and Mineral Resources

First Aid course form Jordanian Red Crescent & Fire fighting ,HSE course by Site Drilling CO .

Paper prepared (Total Organic Carbon Content Determine Delta log R Technique In Wadi Abu AlHamam- Jordan)

Project Engineer, Action international drilling and dewatering services, DUBAI-UAE..Jun2024-Nov2024

Work History

- Undertake review of tender documents (e.g. pumping tests, site investigations, specifications) to assist in system design
- On contract award prepare Method and Task Statements, Risk Assessments, Program, Materials, Schedules and Safe Systems of Work and Progress Reports.
- Directly supervise site activities (Deep well drilling ,discharge line laying, pump installation, electrical connection) ensuring works are carried out safely and according to specification
- Ensure works are carried out to the contract program, Coordinate with Designs Team on design changes based on actual ground condition or client program
- Prepare monthly valuations and organize variation claim documents, Maintain Site Documentation.
- Maintain and Improve Client Relationships
- Manage project schedules and budget to meet project requirements.

- Manage and assign resources as needed within the engineering team.
- Assist with the operation maintenance and repair of equipment and resolve systemic issues providing term solutions.
- Function as a technical specialist and a lead role.
- Practice and comply with safety standards at all times.
- Provide support for scoping of work tasks and budgets.
- Collection of monthly payment certificate from Clients.

Sr.Geologist, WJ groundwater middle east, DUBAI-UAE.Jan 2023 – Mar 2024.

- Site management and supervisor drilling activity in site , mobilization rigs, drilling, sampling, casing and gravel installation, airlifting, pump test.
- Doing reporting -daily drilling report (DD), lithology, casing, pump test reports. and Cross section with interpretation data .
- Maintained schedule of class assignments to meet deadlines.
- Connection with clint and keep working running with keeping safety.
- Design fishing tools and problem solving in drilling and site .
- Maintained open communication with team members and stakeholders, resulting in successful project outcomes.
- Evaluated and monitored drilling operations, ensuring compliance with safety regulations.
- Prepared work orders and communicated with drilling supervisors to dispatch materials to rig worksite, replenish stock and repair equipment.
- Reviewed previous drilling activities to identify areas for improvement in future projects.
- Assisted in troubleshooting any issues that arose during operations such as equipment malfunctions or delays.
- Analyzed geological data and developed strategies to optimize drilling performance.
- Developed detailed hydrogeological reports summarizing results of , drilling logs, pump test and other data collection activities.

Project Manager, Umm Rummana Est, AMMAN-JORDAN. Jan 2019 – Nvo 2021.

- Coordinate internal resources and third parties/vendors for the flawless execution of multiple projects
- Ensure that all projects are delivered on-time, within scope and within budget Develop a detailed project plan to monitor and track progress
- Manage changes to the project scope, project schedule, and project costs Meet with clients to take detailed ordering briefs and clarify specific requirements of each project
- Track project performance, specifically to analyze the successful completion of short and long-term goals Meet budgetary objectives and make adjustments to project constraints based on financial analysis
- Develop comprehensive project plans to be shared with clients as well as other staff members
- Built and established strong partnerships with teams, vendors and contractors.
- Ensured compliance with applicable laws, regulations, policies and procedures throughout the life cycle of each project.
- Reviewed project risks and devised proactive strategies to avoid potential roadblocks.
- Identified project needs by reviewing project objectives and schedules.
- Led meetings with internal team members, consultants and contractors.

Project Manager, Mohammed darwish ghabban Est (MDG), RIYADH-SAUDI ARABIA. Apr2016-Sep 2018.

- Interfacing with internal clients Collaborating with project team to develop project plans and timelines to meet content, budget and schedule requirements Working with leadership to assign resources to projects and updating team-wide resource schedule Checking in with production teams to stay updated on project status
- Meet with managers define the overall goals and objectives of the project ,Prepare recommendations for resource requirements to accomplish the project; Plan, coordinates and establish operating methods and
- procedures for accomplishment of project mission; as needed Establish a system to review, control, and report on project status; Monitors project status and adjusts work plans for project accomplishment. Monitor progress, coordinate delivery dates, and maintain financial controls and systems including marking budgets for all project expenditure ,meetings with vendors & suppliers related to the Program
- Completed day-to-day duties accurately and efficiently.
- Exceeded customer satisfaction by finding creative solutions to problems.
- Maintained schedule of class assignments to meet deadlines.
- Built and established strong partnerships with teams, vendors and contractors.

Consultant Hydrologist / Geologist, AJA Pioneers Est, RIYADH-SAUD ARABIA. Apr 2015 – Mar 2016.

- Hydro geological study for aquifer & maps , supervisor drilling of Water Well (deep and shallow) , drilling ,logging ,hydrology Data analysis, rehabilitation and testing water wells , operations all drilling activity in site ,drawdown , pump test compilation report , wireline logging with data analysis interpretation with installation casing /screen depend the logging data and sample
- ,mapping ,description sample , and problem fixing .
- Hydrogeological field work (site reconnaissance, water level measurements and groundwater sampling, supervision of water well installations and pumping tests)
- Field data review, /GIS-based data management, Support of technical reporting daily drilling report Timely execution of projects in accordance with quality, cost and safety standards, in close consultation with the service line manager and associated project managers ,Technical assistance and support of hydrogeological and environmental projects Cooperation with other service lines and project-related subcontractors or project partners ,Technical field and office work, compiling of project documentations and further task-specific documents.
- Completed day-to-day duties accurately and efficiently.
- Worked with cross-functional teams to achieve goals.
- Identified needs of customers promptly and efficiently.

Site Manager, Saudi Makamin oil & gas Services, RIYADH SAUDARABIA.Nov2014 -Feb 2015.

- Manage drilling work in site, Operation site activity , supervisor drilling , write DD report (daily drilling report), management, QC, communication, awareness HSE procedure in field, competitively plan the geological aspects of a well including well and data, identify and mitigate drilling and subsurface risks, Supervisor the contractors and their responsibilities, manage well site derived data effectively, evaluate formation, report preparation, lead fishing operation, sample description, interpretation data ,borehole plans and drilling fluid programs. Ensure maximum production and full utilization of all equipment, tools, manpower and facilities involved with drilling operations. Reducing leakage through efficient
- operation .Support the mobilization to site of drilling rigs, . Technical / Drilling point of contact to onshore and field operations during project execution. Monitor market fluctuation and technical developments in all areas of 3rd party supplied drilling equipment and drilling fluid .
- Be actively involved with the procurement of drilling equipment and tooling, and also extraneous drilling plant, to ensure best value and budget compliance. Review project documents (Drill Logs) to ensure compliance with correct drilling methodology, and ensure daily targets are met to achieve maximum production throughout entire project lifecycle.
- Analyzed reports to identify areas for improvement in performance or cost savings.
- Mentored new employees on safety protocols, processes and procedures.
- Managed daily operations of the site, including staff and contractors.
- Coordinated workflow between departments to maximize productivity.
- Maintained daily communication with subcontractors and inspectors to drive forward progress of project.
- Scheduled maintenance tasks and ensured all equipment was functioning properly.

Geologist /Geophysicist, INTEK Inc, AMMAN-JORDAN. Feb 2014 – Aug 2014.

- Lead exploration team in site for mining oil shale (Geological studies, site investigation, modeling, description sample and core logging Data analysis & Operator wireline logging tool (Century-Geo)), run log to depth 300m for exploration oil shale .
- Coordination all operation in site, interpretation data, Manufacturing new equipment operation the drilling activities in site
- ,reporting , detect new possible boreholes by GPS and map , cross section , mapping ,help and gave hand to making fishing tools for (rock bit ,drill coaler ,pipe and also logging probe)and supervisor in fishing operation in site ,Write final report , make calculations for TOC(Total organic carbonate) and oil yield from oil shale depending to the data from logging , expert in WellCAD program process data and calculate volume , logging sonde (caliper , Resistivity ,NGRS natural gama also sample description and reporting drilling core supervisor activity

Geophysicist ,Geologist-Wireline Logging Engineer, Site Group For Drilling and Services ,BAUER Group, AMMAN- Jordan.

Dec 2009 – Jan 2014.

- **Nov 2012 – Jan 2014 Wireline logging Engineer**
- Operation wireline logging tools (Geovist ,Robertson), run log to depth 2000m , Coordination with the client and supervisor to the operation before go to site an also in site ,interpretation data, Maintenance logging tools , Manufacturing new equipment will help to work like wheels in different position + gave hand to making fishing tools for (bit ,drill coaler ,pipe and also probe) and supervisor in fishing operation in rig ,Write final report , calculation average caliper and other calculation for drilling department
- . Rehabilitation of Water Wells - Data analysis, rehabilitation procedures and testing, operations and pump test Make inventory sheet and communication with other for deliver new tool or parts , expert in WellCAD program to process data and in logging sonde (4ACS calliper , Elog Normal Resistivity Focused Resistivity Measures 16 64 SPR ,NGRS natural gamma ray ,DII3 Dual Induction Induced Polarization , flowmeter ,ASMP water sampler ,CCTV ,TCME Temperature conductivity ,SP Self-potentially, Density by use source Cs173 , Sonic / CBL).
- **Jan2011-Oct 2012 Operations Geologist, Well Site Geologist.**
- Operation the geological work in geologist department ,write daily report for drilling department ,mange the operation inside geological department (tools, rotation, sieve analyses test for sample description sampler and make check for daily report received from geologist in site.

Dec2009 Dec 2010 Geologist , Hydrologist.

- Supervisor drilling exploration(DD,RC drilling) wells sample descriptions , log core descriptions cross section , modelling , team lead and mobilization for rig and team ,description sampler (core ,cutting) write drilling report
- mange all operation on rig and between Write pumping test report ,collection data from pump and flow meter value
- supervisor on flowmeter test operation , supervisor wireline logging (sampler ,Gama ray)
-
- **Geotechnical /Lab Geologist, Engineering Axis for Studies, AMMAN-Jordan. Oct 2009 -Dec 2009.**
- Supervisor for drilling exploration(DD,RC drilling) wells sample descriptions , log Technician core descriptions cross section , modelling , team lead and mobilization for rig and team ,description sampler (core ,cutting) write
- drilling report ,mange all operation on rig and between Description sample, write a report , sieve analyses soil test and concrete test , site investigation
